Product Description

Husqvarna 525PT5S Pole Saw

Husqvarna's 525PT5S is the longest telescopic pole saw in its class*. Engineered with Husqvarna's LowVib™ technology, the pole saw delivers low vibration levels for maximum safety and ease of use. The 525PT5S is powered by X-Torq® engine technology that delivers an excellent power-to-weight ratio. The automatic bar and chain oiler, toolless air filter access, and commercial-grade, 7-spline solid shaft all provide the performance and reliability you need to get the job done. For superior productivity and precision cutting, put a 525PT5S pole saw to work on your next pruning or limbing job. (*Based on measurement with cutting equipment. Class defined as pro-grade petrol telescopic pole saws with engine displacement above 25cc.)

Features -

- X-Torq® engine
- Telescopic tube
