Product Description

PG2A Dewatering Pump

Clear clean water from your job site or swimming pool quickly with the PG2A dewatering pump. This simple, easy-to-use pump is designed to move water up to 158 GPM (600 l/min) with very few solids, up to .25-inch (6.5 mm). With its self-priming centrifugal pumping action and overall compact size, the pump is ideal for the contractor with the need for temporary water removal.

Features:

- Cast iron impeller and volute are wear-resistant for long life and minimal service.
- Pump-out vanes on the back of the impeller reduce debris accumulation and downtime while allowing greater productivity.
- Carbon ceramic mechanical seal teamed with a reliable four-cycle engine with low oil shutdown provides for increased operating life.
- High strength lightweight die-cast aluminum housing increases the years of trouble-free pump life. A heavy-duty protective frame provides convenient carrying handles while adding extra protection for the pump.
