Product Description

Bearcat CH45540 4.5-inch PTO Chipper

MAINTAIN POWER. REDUCE MAINTENANCE.

Using a Crary® Bear Cat® PTO machine reduces engine maintenance, giving you more uptime to work. With a wide selection of PTO machines ready to go to work for you, it's time to match your tractor with a Crary Bear Cat PTO Chipper and Chipper/Shredder.

The Crary® Bear Cat® CH45540 is the perfect match for your compact tractor. It's built with heavy-duty, 7-gauge steel. The 14" x 1" thick, 49 pound dynamically-balanced rotor utilizes two reversible heat-treated chipper blades and is driven by a double-banded belt for maximum power transfer. The cantilever mounted rotor design helps reduce wrapping while chipping wet, stringy wood types.

Also available is an optional 4" x 4.5" truck loading discharge chute with deflector cap. This optional chute directs the chips and raises the discharge of chips into the trailer or back of a pickup.

NOTE - For Use On Tractors with PTO Horsepower Ratings From 15 hp to 28 hp

CE compliant model is available.
