Product Description

2023 American LandMaster L7 Crew - 4WD

POWERFUL EFI 4X4 ENGINE, IMPRESSIVELY-SMOOTH RIDE

The L7x comes built with our most powerful 694cc EFI commercial-grade engine and includes power steering as a standard feature. The superior ride and comfort is attributed to our unique L-ROSS (Landmaster Ride Optimization System). The L-ROSS works seamlessly together to provide the ultimate SUV-like ride-and-drive experience. Travel over bumps, hills, uneven terrain, and muddy bogs smoother than ever.

Our crew model now travels up to 35mph to get you from point A. to B. quickly and smoothly.

The L7x is the ideal UTV for frequent hauling of passengers, hunters, large manufacturing facilities, municipalities, police, fire, or just a fun vehicle to haul around friends. Customize the L7 the way you want and fit your lifestyle with our new Plug N' Play electrical system. Built for reliability, functionality, and ease of installation.

ROPS Certified
