Product Description

2023 American LandMaster EV - 4WD

BE BOLD. BE DIFFERENT. BRING HOME THE FUTURE TODAY.

Introducing the Landmaster 4x4 Lithium-Ion Side By Side! If you're looking for the ultimate hunting vehicle, you found it - Hardworking, ultra-quiet, and smooth-riding, perfect for hunting, back wood trail riding, hauling, towing, or just for fun. Come prepared this hunting season to sneak up on your game unnoticed. Get in and out of the woods easily with locking rear differential and 4WD engagement with the flick of a switch. With up to 50 miles of range, the Landmaster EV 4x4 is a quiet, stealth-crawling vehicle that can get you in and out of the woods without concern of running out of power. Tackle all your big jobs with capacities of hauling up to 500lbs and towing up to 1,200lbs. And at the end of the day, plug your vehicle in and you'll be fully charged the next morning to do it all over again.

Thanks to our unique L-ROSS (Landmaster Ride Optimization Suspensions System) you'll barely notice the rumble strips, railroad ties, or large rocks you just plowed over. Your life will get a whole lot easier knowing you can tackle heavy jobs, loaded trails, tight corners, and muddy trails. Plus, you'll have added comfort even in the most uncertain environments due to our unique coil-over shock setup and supersport trailing arm.
