Product Description

Billy Goat PL2501SPV Hydro-Drive Aerator

For the best combination of productivity, operator comfort, superior aeration results, variable hole density, and remarkably low maintenance in its class, the PL2501 Ser. PLUGR offers an estimated 30+ percent greater return vs. traditional drum aerators. Best-in-class controls offer the same intuitive, variable-speed fingertip hydro-drive innovation as found on the Billy Goat family of hydro-drive products. The Proprietary EZ Drop™ tine system has a one-step tine engagement lever from the handle that permits the operator to pass over obstacles in the aeration path for uninterrupted aeration.

Features -

User-Friendly Controls:

The handle has fingertip-controlled bail for engaging drive/tine. To raise and lower tines, the tine retractor lever is comfortably top mounted.

Speed Adjust Lever

3 speeds. Allows for denser hole pattern at slower speed where needed. Match speed to landscape complexity, lawn size, operator comfort and maximum productivity.

Reciprocating Crankshaft Assembly

Punches tine core depths to 2.75" even in hard soil conditions.

Eight (8) Machined & Heat Treated Hardened Thin Wall Tines

Simple, durable screw in design makes service simple. 5/8" diameter.

One-Piece Lift-Off Removable Cover

Offers ease of maintenance for 100% access to all components.
