Product Description

Maruyama MSD51 Direct Drive Pump - Gas

Maruyama direct drive pump MSD51 offers a compact design and features Maruyama's patented UNIFLOW technology that ensures that the fluid moves in only one direction through the pump reducing pulsation and maintaining constant pressure for an efficient chemical application. Maruyama piston pumps require a lot less energy to operate and are easy to maintain. Ideal for use in lawn care, agriculture, golf, pest control, sanitation, parks & recreation, tree care industries and even fire suppression.

Every pump is manufactured to the highest standards and tested prior to delivery for unmatched quality control.

Building quality spray equipment since 1895!

MAIN FEATURES

- IRON-5YR commercial warranty
- Legendary Maruyama UNIFLOW™ technology which minimizes wear by lubricating and cooling piston cylinders for continuous flow
- Self-priming and strong suction
- Superior materials, all stainless-steel valves, springs, chromed cylinder, chrome-moly steel crankshafts and die-cast aluminum crankcase
